

## Pure Sine Wave (2.5KVA/48V)

Su-kam's Sine i is the world's most advanced inverter. This is because it is based on the world's most advanced DSP Sine Wave Technology. It provides all connected appliances with a steady source of 100% Pure Power. This power is actually purer than the power supplied from the mains. Proof of the fact is that appliances don't make an irritating, humming sound, as they do on other inverters.

Today, households across India have some of the most expensive and sophisticated electronic equipment, anywhere in the world. . New generation Refrigerators, Washing Machines, Microwave Ovens, DVDs, Music Systems, TVs, Air Conditioners. Unfortunately, during power cuts, none of these can be used, as the ordinary inverters do not supply the right power for their sophisticated circuitry.

However, Su-kam's Sine I Inverter gives users the amazing advantage of being able to use all their most expensive and sensitive electronic equipment at all times.

- DSP based PWM technology using MOSFET
- Suitable for all equipments
- Ideal for noiseless operation of all the equipments
- Software controlled PWM based pulse charging
- Enhanced battery life
- Auto self test for inverter on LCD display
- LCD panel for battery level and load level
- LCD panel for status and Remedial actions
- Generator compatible
